

# SCOUT

## Engineered for fast water, technical runs, and serious upriver performance.

The Wooldridge Scout is the little brother to our flagship Canyon model. Its distinctive broad-bow design delivers exceptional lift and precise handling in challenging whitewater, perfect for fast canyon runs and technical river work. Available in 19', 21', and 23' lengths (with custom sizes available), the Scout comes standard with either a walk-through, center 3-piece windshield or an open center console positioned in front of the inboard engine. One feature unique to the Scout is its taller standing windshield, designed to improve visibility when reading fast-approaching water. The Scout can also be tailored with options such as an enclosed cabin, raised rear Idaho deck, or stick-steer controls. Additional standard features include full-length welded side trays with marine carpet for rod and tackle storage, plus stand-up gunnels with toe kicks for enhanced comfort and stability while fishing. Available with a variety of engine and jet combinations, including the standard KEM 5.3DI paired with the Hamilton 214 pump and turbo impeller.
